Willow, fast growing and eco-friendly

This fast growing, sustainable material benefits from regular cropping. Willow absorbs, and locks in carbon dioxide during growth. When buried the CO2 remains locked in. If cremated, only the same quantity is released back into the environment - making it 'Carbon-Neutral.'

The delicate Art of Cloisonné

Cloisonné is a centuries old enamelling technique, which consists of soldering delicate silver wire onto a metal surface. Once a design is created, the resulting cellular spaces, called cloisons (*French: "partitions" or "compartments"*) are filled with enamel paste. Multiple options to suit your needs, available in two designs Etienne Autumn Leaves and Etienne Butterfly.
